Series Overview

DH-PFWB5 series is a line of PTP and PTMP base stations and customer premises equipment dedicated to last-mile and video surveillance applications. It offers a wide variety of devices ideal for Internet service providers and operators to run their networks using unlicensed bands. The powerful software platform with a proprietary communication protocol ensures smooth performance even in the most congested environments. The professional-grade integrated hardware design allows for quick return on investment and minimizes operational costs.

Scene

Suitable for internet access, video surveillance and use in rural areas.

Functions

TDMA Enhancement
Adopts TDMA (Time Division Multiple Access) technology to stabilize video transmission bandwidth, and to locate wireless transmission hidden nodes.

Wide Operating Temperature (−30 °C to +70 °C)
Supports working at ambient temperatures of −30 °C to +70 °C, and has built-in professional lightning-proof circuits that effectively reduce the impact of thunderstorms on network systems and improve system robustness, allowing the device to adapt to harsh environments.

Enhanced Antenna
Features enhanced antenna gain for the stable transmission of wireless signals over long distances, and it has strong anti-interference capabilities.

Minimal WEB
Designed with a minimalist graphical WEB, easy to operate, which improves configuration efficiency.
